ABOUT ME

Full-stack developer is skilled in JavaScript, TypeScript, Node.js, React, Svelte, Next.js, NestJS, Laravel, MySQL, MongoDB, and REST APIs. Passionate about building scalable applications and integrating AI tools like OpenAI, LangChain, and vector databases to solve real-world problems.

SKILLS

JavaScript | TypeScript | PHP | Nodejs | NestJS Framework | Svelte.js | PHP Framework Laravel | Full-Stack Development with Javascript (Nodejs + Reactjs) | RESTful api | SQL (ORM's: sequelize, prisma) | Databases: MySQL, MariaDB, PostgreSQL, MongoDB | work as a team | Web Development | HTML5 | OpenAI | LangChainJs | AI development | API Integrations | Drizzle-ORM | web programming | BootstrapCSS, TailwindCSS | MERN Stack Development | Go lang | Web Sockets | Github, Github actions | CI/CD (Gitlab CI, testing) | GraphQL API

WORK EXPERIENCE

 **NAMESPACE IT** - DHAKA, BANGLADESH

JUNIOR SOFTWARE ENGINEER - 17/12/2023 - CURRENT

Main Activities and Responsibilities - Namespace IT

- Developed and maintained full-stack web applications using Node.js, Next.js, NestJS, and Laravel
- Built RESTful APIs and integrated third-party services, including OpenAI
- AI-Based Application
- Collaborated with front-end and back-end teams to deliver scalable software solutions
- Worked on database design and optimisation using MySQL and MongoDB
- Implemented secure authentication systems and role-based access control
- Participated in code reviews, debugging, and continuous improvement of existing features

 **AI POWER IT & MULTIMEDIA** - DHAKA, BANGLADESH

FULL STACK DEVELOPER - 01/07/2021 - 31/10/2023

My responsibilities at AI Power IT & Multimedia included developing web apps and APIs, debugging them, and ensuring that they functioned properly. I used Node.js, React.js, SQL and NoSQL databases, Prisma, React Redux, Redux Toolkit, and other modern technologies to build scalable and effective apps

PROJECTS

2024 - CURRENT

Aionlinecourse.com

I worked with my team to create the site using Node.js, Next.js, Laravel, GraphQL, REST API, D3.js, and other technologies. Users can learn about machine learning and artificial intelligence (AI) through blogs and quizzes on the website, and projects can purchase pre-trained AI projects. I have created a network graph for connected research papers utilising D3.js, GraphQL, FastAPI, Vector DB, and other technologies.

2024 - 2025

CasePDF

This is the personal webpage of a US lawyer. He can upload case documents and analyze them using the OpenAI (complex analysis) API, as well as perform simple and advanced search and query operations on his papers. I've used Laravel, Laravel API, OpenAI API, and cutting-edge technology.

2024 - CURRENT

windowestimates.com

This is a SaaS home decorator project for a US client. This project is in progress, and I am unable to give much more information about it due to security concerns. The project uses Fast API for the backend and Next.js, MongoDB, JavaScript, Mongoose, and other technologies on the frontend.

Uppercodes

A typing test project for students built with Laravel, ReactJS, MySQL, TypeScript, and PHP.

- Students can practice from any listed typing lessons
- A dynamic admin panel
- Fully dynamic user dashboard page with proper charts, graphs and lists
- interactive, fully dynamic admin dashboard analytics page
- Interactive charts and graphs for analytics
- The user can track their typing test
- Separated the admin and user dashboards

Link <https://typing.uppercodes.com>

BaseEcom (company website)

I developed the website using Laravel, React Starter Kit, MySQL, and various APIs. A fully-functional, backend-ready company profile website
